Meeting Overview

The Sustainability Science and Informal Science Education Convening is a small workshop of ISE-funded principal investigators and their project evaluators who have been brought together to inform and improve how we do our work as ISE professionals. The structure and content of the workshop includes both theory and practice, and draws on participants' experience and reflections on work in this realm. Other attendees and facilitators include NSF program officers, outside experts, and CAISE staff, advisors and evaluators.

The intent of this convening is to deepen our collective understanding of sustainability science, explore how the ISE field can build capacity in this area, and to discuss future directions for our projects, NSF's investments and the field writ large. One of our goals is for actions and outputs from this workshop to flow into and inform strands of the March 2012 ISE PI Meeting.

The discussions, outcomes and products from the workshop, as well as the materials and thinking that informed it, will be shared with the ISE field via CAISE communication channels following the convening.
