Overview of NSF Research Coordination Network (RCN) Solicitation
About RCNs

- The agency-wide Research Coordination Network solicitation is: NSF 17-594:

- RCN in Undergraduate Biology Education (RCN-UBE). DUE participates with BIO in an RCN track that has its own solicitation, with a specific deadline:
Synopsis of the RCN Program

Advance a field or create new directions in research or education by supporting groups of investigators to communicate and coordinate their research, training and educational activities across disciplinary, organizational, geographic and international boundaries.

Foster new collaborations, including international partnerships, and address interdisciplinary topics.

Innovative ideas for implementing novel networking strategies, collaborative technologies, and development of community standards for data and meta-data are especially encouraged.

RCN awards are not meant to support existing networks; nor are they meant to support the activities of established collaborations.
RCN awards do not support primary research.

RCN supports the means by which investigators can share information and ideas, coordinate ongoing or planned research activities, foster synthesis and new collaborations, develop community standards, and in other ways advance science and education through communication and sharing of ideas.

Proposed networking activities directed to the RCN program should focus on a theme to give coherence to the collaboration, such as a broad research question or particular technologies or approaches.
All RCN proposals must conform to the following 7 guidance items:

- Topic/focus of research coordination.
- Principal investigator (PI).
- Steering committee.
- Network participants.
- Coordination/management mechanism.
- Information and material sharing.
- International participation.

In addition, the narrative must include a management plan, a coordination plan, and a plan to increase diversity.
Details

**Full Proposal Deadline(s)** (due by 5 p.m. submitter’s local time)
- Proposals Accepted Anytime. RCN proposals should be submitted to a particular program according to the program’s submission dates.

**Anticipated Type of Award:** Standard Grant or Continuing Grant
- The actual number of awards varies across disciplinary research programs.

**Anticipated Funding Amount (agency-wide):** $7,500,000 to $12,500,000
- No firm funding commitments requested. No general oversight. Programs make their own decisions.

RCN proposals can be up to 5 years in duration and budgets should not exceed $500,000. [This may be flexible, depending on the program. Check with a PO in the program to which you are likely to apply.]

Investigators should consult program descriptions on the NSF website and are strongly encouraged to contact appropriate program directors to discuss suitability of an RCN idea prior to submitting a proposal.

If an RCN project is relevant to multiple programs, divisions, or directorates, before submitting a proposal the investigator should consult with program directors in those programs for guidance on suitability for co-review among programs and instructions on how to submit.
Additional details

Proposals may only be submitted by the following:

- Universities and Colleges - Universities and two- and four-year colleges (including community colleges) accredited in, and having a campus located in, the US acting on behalf of their faculty members. Such organizations also are referred to as academic institutions.

- Non-profit, non-academic organizations: Independent museums, observatories, research labs, professional societies and similar organizations in the U.S. associated with educational or research activities.

- **Organization Limit:** Although the research coordination networks are expected to be multi-organizational, a single organization must serve as the lead and all other organizations as subawardees. Organizations ineligible to submit to this program solicitation may not receive subawards. If they are part of the proposed network, their participation is expected to be supported by non-NSF sources.
Examples

• A very recent award: DRL 2005898: Developing a Network to Coordinate Research on Equity Practices and Cultures in STEM Maker Education

• See other examples of RCNs around the agency:
  • The RCN that led to the National Alliance for Broader Impact (NABI), now Advancing Research Impact in Society (ARIS): [https://nsf.gov/awardsearch/showAward?AWD_ID=1408736&HistoricalAwards=false](https://nsf.gov/awardsearch/showAward?AWD_ID=1408736&HistoricalAwards=false)
  • RCN-UBE examples are also included here. More information are on the slides at the end of this deck.

RCN in Undergraduate Biology Education (RCN-UBE)

- Recent awards are listed near the end of the webpage.
Reminders

• Review NSF’s Proposal and Award Policies and Procedures Guide (PAPPG)
• Review the solicitation for the RCNs and the program you RCN aligns with
  • Take into consideration the priorities of the program you submit your RCN proposal to
  • You will submit your RCN proposal to the program’s deadline (e.g. January 12 for AISL)
• RCNs do not support primary research, but should be guided by a topic or question – what will you explore?
• RCNs should have a research focus rather than solely a practice focus
  • But practitioners can be included!
• Not meant for well-established networks
• Contact a Program Officer: share a 1-page concept paper
